

HAAS STORYBOARD

Before his second hip surgery on July 19, Andrew edited *Share the Story* in Moroccan Arabic and passed this latest dialect off to our brand new sound engineer. Kelly joins MOTION after four years on TWR's radio partnerships team. Everyone jokes that MOTION is good at adding women but Andrew doesn't worry about being the only man currently on the team. It's just important to find capable people for critical roles. We could double to a team of 12 and still have more than enough work for additional folks in editing, accounting, marketing, animating, etcetera. We trust God and ask him for more qualified folks to work in his harvest fields.

The Thai Buddhist series work continues with new drawings every week. We're preparing simple animatics so the composer has rough versions to compose the first batch of soundtracks. There's a lot to do to stay on schedule and our little creative team appreciates your prayers.

Kelly's old role was often on-air.

Michigan and Maryland Visits

The second weekend of September, we will be in Grand Rapids to visit Banner Church and see some of Holly's family. Banner is a supporting congregation in Byron Center, Michigan, that has stood with us for over two decades. We were so honored that a work team from Banner came to Raleigh two years ago to bless us with their time and talent. They worked on TWR's facilities and our house, as well as helping our local church host our very first VBS.

Sunday, September 10, we will share for 10 minutes in Banner's 9:30 am service. That night at 6 pm we'll show TWR MOTION's 27-minute documentary *The Best Possible Idea* with snacks & drinks, followed by Q&A. You're invited to join both of these events if you're in the area. For Banner's address, visit bannerchurch.org.

Although we don't have dates yet, the MACC (Mid-Atlantic Community Church) in Gambrills, Maryland, said they'd like to feature us at their quarterly missions luncheon in November. Find out more at themacc.org.

Honored for a Quarter Century

We mentioned last year about starting our missionary careers in 1997. Holly was an intern for that summer so her official start date is the following year. In late June, TWR marked our 25th anniversary of full-time service. And the wonderful TWR MOTION team did what they do best — made a video featuring interviews, photos and greetings from coworkers around the world. Watch it now at vimeo.com/twrmotion/haas25years.

Some of Holly's fellow staff at Antioch Raleigh prayed over us during the TWR staff meeting where we were recognized.

**ANDREW & HOLLY:
25 YEARS
IN MINISTRY**

1997-2005
A NEW JOURNEY

Andrew joined the JESUS Film based in Orlando, Florida, on "an Indiana Jones"-type mission to travel & record film translations.

Holly joined TWR on Guam for an internship to finish her degree.

Health and Other Needs

We are praising God for another successful surgery, rapid recovery and the ability to work from home while still recovering. Holly was gracefully extended time away from her roles at the church to be a full-time caregiver for another two weeks, which makes us increasingly thankful for the godly men and women of Antioch Raleigh.

Andrew's energy level has been lower since the second surgery. This is unsurprising since healing requires energy and now both hips (not just one) are in the middle of what the surgeon said is a 12-month healing process. A lesson learned is to accept your limits humbly and take naps as needed. Sometimes the body needs more rest than is possible during the night.

This year a long-time supporter decided to stop giving. We wish them well, but when \$1,000 a month is no longer being donated it's quite a hit. We know that the Lord is our provider and are walking in obedience to him. If you feel led to give, visit ahaas.com/give for all the ways. We pray you have a blessed fall — the season, not accident.

Blessings,

Andrew & Holly

A pre-surgery selfie. Holly was extra kind when Andrew woke up confused from anesthesia this time.

Andrew got a special hat before being wheeled into the operating room.

Slowly walking into the house after the second operation. We're glad the human body only has two hips.
